Quelites

■ Passion for coding

■ Self learning capability

■ Team work

■ Hard work

Education

2021-Now	**B.Sc in Computer Science and Engineering** Varendra University,Rajshahi Final Project: Full stack Gym Management system

Experience

2021-2023	**Front end developer at Xemiron IT Solutions** Vodra, Rajshahi
2023-Now	**Junior full stack developer at Global Community Organization** Bagha, Rajshahi

Courses

2022	**Think in a Redux way Course** React Redux,Redux toolkit 89.29% marks obtained - Report
2022	**Reactive Accelerator** React Advanced, Next js, Mongo db 85.15% marks obtained - Report
2025	**Job Roles in the Cloud & Cloud Essentials Knowledge** Cloud Essentials Knowledge - Done (A+) Link

A few word about myself

I am a self-taught, passionate full-stack web developer specializing in the MERN stack. I build scalable applications with Node.js, Express.js, and databases like MongoDB, MySQL, and PostgreSQL, alongside responsive React.js frontends and full-stack Next.js projects. Recently, I completed the full web app infrastructure for three organizations, including web servers, websites, and mobile apps. I'm skilled in IoT (Raspberry Pi, NodeMCU) and currently learning Rust while diving deeper into vector databases.

Projects

Global Community Organization App
Technologies: Next.js, TypeScript, NextAuth, PostgreSQL, shadcn/ui.
Developed a full-stack application for a sustainability nonprofit. Implemented secure user authentication, admin controls, tree/child data management with GPS tracking, and real-time analytics. Strengthened skills in end-to-end development and mission-driven solutions.
Blog

Lot of interesting project are keep in Github
